

Frequently Asked Questions

DOES STRAINER GET CLOGGED?

Strainer is 90% effective in keeping debris out of gutters. A small percentage of homes may experience problems with water running off or birds' nests.

WILL STRAINER WORK DURING HEAVY RAINFALLS?

Strainer's capacity for taking on water greatly exceeds the U.S. record for rainfall amounts.

WILL I HAVE TO REPLACE MY GUTTERS?

No! Strainer can be installed on existing 5" and 6" K-style gutters unless they are damaged.

HOW LONG WILL STRAINER LAST?

Because Strainer is manufactured with hi-temper aluminum, it will never rust or rot.

WILL STRAINER WORK WHEN COVERED WITH WET LEAVES OR PINE NEEDLES?

Yes! Testing of Strainer shows that the filtration system will continue working even when covered with wet leaves and debris.

Strainer Style Leaf Protection

***Strong, Effective,
and Affordable***

HOW STRAINER WORKS

Rainwater from your roof drains through the 1/8" perforated holes.

Leaves, twigs, pine needles, and even the smallest debris are suspended on top of the panel. Air circulation through Strainer allows the leaves and debris to dry up and blow away in the wind.

Strainer is installed to fit snugly to the top of your gutters with zip screws (securing it to both the front and the back). The low profile makes it virtually invisible from the ground.

Because Strainer lays flat on top of the gutter, there is no penetration of your roof shingles, so roof warranties will not be affected.

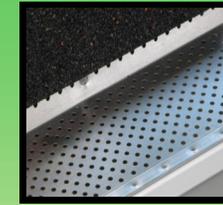

WHY SHOULD YOU INSTALL STRAINER?

1. Clogged gutters can cause water to back up into the house, leading to wall and ceiling damage.
2. Landscaping can be ruined by overflowing water.
3. Excessive water around the foundation of a home may eventually cause cracks around the foundation walls.
4. The wood fascia around the house can rot by water backing up from the clogged gutters.
5. Standing water in your gutter attracts insects.

THE END OF CLOGGED & OVERFLOWING GUTTERS

- Keep your gutters free from leaves and debris
- No more cleaning gutters
- No more climbing ladders
- Add years to the life of your gutter system

Installation

Zip screws secure Strainer to the top, front lip of the gutter and to the back of the gutter.

Appearance

The hi-temper aluminum finish is not visible from the ground and does not require interaction with the roof.

Easy to Repair

The 10' panels can easily be replaced in the event that a section is damaged by a falling tree.

Cost Effective

In addition to saving on future cleaning costs, Strainer is competitively priced.

20 Year Warranty on Manufacturing!
